

SERVICES PORTFOLIO

Savannah Environmental (Pty) Ltd is a wholly-woman owned specialist environmental consulting company that provides environmental management services in accordance with the requirements of relevant environmental legislation. The company was established with the aim of providing a holistic and professional environmental management service to public and private sector clients.

The company has a dynamic team of consultants with multi-disciplinary skills, comprising 10 permanent staff members. Depending on the client's needs and the nature of the service required, we are able to bring on board appropriately skilled personnel from a developed network with leading experts in various environmental-related disciplines to provide a quality service.

The company is based in Gauteng, with working knowledge in all 9 provinces of South Africa.

SERVICES WE OFFER

Savannah Environmental provides environmental management, assessment and advisory services on a variety of development projects throughout South Africa. The company is actively involved in providing specialist consulting services for renewable energy developments (specifically wind and solar power plants) throughout South Africa. Over the past 4 years, we have become a leader in providing environmental services to the renewable energy market.

Through our experience in the project feasibility and development of several renewable energy projects in South Africa, we are well placed to provide a range of environmental services to the renewable energy industry at all stages of the project life-cycle. Services include:

Pre-Feasibility Services

- Input into site selection
- Pre-feasibility site analysis and screening based on environmental criteria
- Pre-application consultation with Environmental authorities
- Strategic Environmental Assessment

Pre-Feasibility Services

Project Implementation Services

Project Implementation Services

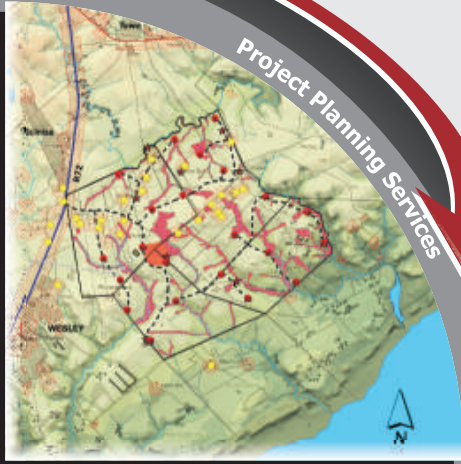

- Development of site-specific Environmental Management Programmes for construction and operation following the finalisation of the design for the facility.
- Provision of Environmental Control Officer (ECO) Services from pre-construction through to rehabilitation.
- On-site compliance monitoring and compliance reporting at project construction, rehabilitation and/or operation stages.
- Facilitate specialist services and monitoring, including bird monitoring, heritage mitigation etc.
- Community liaison

**Professional Environmental
Consulting Services**

Project Planning Services

- Environmental impact assessment (EIA) processes to evaluate the risk of development at project development stage
- Public consultation and stakeholder engagement
- Development of comprehensive Environmental Management Programmes (EMPs) for all stages of project development and implementation

Project Development Services

- Plan and action tasks required to be completed during the project development phase to ensure compliance with conditions and specifications of the Environmental Authorisation (EA) and approved project EMP as the project progresses.
- Review of basic design and bid documentation to ensure inclusion of relevant environmental requirements and compliance to the conditions of the EA and approved project EMP for the project.
- Assistance with the application for required environmental permits, where required, including Water Use Licence application, waste permit, heritage permit etc.
- Facilitate handover of compliance monitoring role to the appointed Environmental Control Officer (ECO) for the construction phase.
